Subject Index for Volume 8

- (113) facet of diamond
 - Morphology of chemical vapor deposition diamond particles grown at high temperature, 1261
- 3H luminescence
 - 3H luminescence in electron-irradiated diamond samples and its relationship to self-interstitials, 1847
- 6H-SiC
 - Confocal micro-Raman scattering and Rutherford backscattering characterization of lattice damage in aluminum implanted 6H-SiC, 357
- 6H-SiC
 - AlN films grown on diamond and silicon carbide, 1267
- 6H-SiC(0001)
 - Reaction of palladium thin films with an Si-rich 6H-SiC(0001) (33) surface, 352
- 6H-SiC pn junction
 - Temperature behavior of the 6H-SiC pn diodes, 341
- sp²-Hybridized boron nitride
 - The influence of excited hydrogen species on the surface state of sp²-hybridized boron nitride, 2053
- sp³-Hybridized boron nitride
 - The influence of excited hydrogen species on the surface state of sp²-hybridized boron nitride, 2053
- CHEMKIN
 - Simulations of the hot-filament diamond CVD gas-phase environment: direct comparison with experimental measurements, 1388
- a-C:H
 - Plasma chemistry of an expanding Ar/C₂H₂ plasma used for fast deposition of a-C:H, 677
- a-CH(N) films
 - Internal stress of a-C:H(N) films deposited by radio frequency plasma enhanced chemical vapor deposition, 1214
- a:DLC films
 - Physical properties of a:DLC films and their dependence on parameters of deposition and type of substrate, 1050
- Ablation
 - Laser approaches for deposition of carbon nitride films — chemical vapour deposition and ablation, 577
- Absorption
 - Correlation between ND1 optical absorption and the concentration of negative vacancies determined by electron paramagnetic resonance (EPR), 1572
- Absorption coefficient
 - The potential of CVD diamond as a replacement to ZnSe in CO₂ laser optics, 1759
- Acetone
 - CVD diamond grown by microwave plasma in mixtures of acetone/oxygen and acetone/carbon dioxide, 1393
- Acetylene
 - Nitrogen addition during flame deposition of diamond: a study of nitrogen-enhanced growth, texturing and luminescence, 2127
- Acoustic waves
 - Acoustic wave propagation in free standing CVD diamond: Influence of film quality and temperature, 732
- Acoustoelectronics
 - Application of aluminum nitride films for electronic devices, 369
- Activation
 - Prospects of novel hybrid methods for the activated chemical vapor deposition of diamond, 1371
- Adhesion
 - Processing-structure-adhesion relationship in CVD diamond films on titanium substrates, 17
 - Improvement of the adhesion of sputter-deposited cubic boron nitride films, 110
 - Synthesis of adhesive c-BN films in pure nitrogen radio-frequency plasma, 382
 - The effect of refractive index on the friction coefficient of DLC coated polymer substrates, 538
 - Hard-metal woodcutting tool tips coated with tetrahedral amorphous carbon, 1225
 - Adhesion of diamond coatings on steel and copper with a titanium interlayer, 1549
 - Characterisation of CVD grown diamond and its residual stress state, 1555
 - Effects of ion beam processing parameters on the adherence of DLC films, 1648
- Adhesion strength
 - Study of the wear behavior and adhesion of diamond films deposited on steel substrates by use of a Cr-N interlayer, 859
- Adhesion tests
 - Diamond-coated tools, 830
- Aggressive environment
 - Barrier properties of carbon films deposited on polymer-based devices in aggressive environments, 2103
- Aging
 - Infrared and Raman analysis of plasma CVD boron nitride thin films, 398
- AlGaIn
 - Fabrication of aluminium nitride/diamond and gallium nitride/diamond SAW devices, 309
- AlN
 - Growth, doping and characterization of epitaxial thin films and patterned structures of AlN, GaN, and Al_xGa_{1-x}N, 288
- Alpha particles
 - Thin film diamond alpha detectors for dosimetry applications, 952
- Aluminum nitride
 - Application of aluminum nitride films for electronic devices, 369
 - AlN films grown on diamond and silicon carbide, 1267
- Amorphous
 - Structural and electronic properties of highly photoconductive amorphous carbon nitride, 440
 - Radiation-induced release of hydrogen from C:H films: basic regularities and mechanism, 2164
- Amorphous carbon
 - Electrochemical behavior of amorphous carbon films: kinetic and impedance-spectroscopy studies, 64
 - Optical properties and new carbon forms of sputtered amorphous carbon films, 446

- The kinetics of sputtered deposited carbon on silicon: a phenomenological model, 490
- Thermal annealing behaviour of alloyed DLC films on steel: Determination and modelling of mechanical properties, 510
- Optical and electrical properties of a-C:H deposited by magnetic confinement of r.f. PECVD plasma, 522
- Nanoindentation and nanoscratching studies of amorphous carbon films, 558
- HREM study of ultra-thin, amorphous carbon films and structural changes of carbon forms to diamond under ion bombardment, 688
- Carbon FED requirements — application to a PLD carbon cathode, 801
- Preparation and wear behaviour of woodworking tools coated with superhard layers, 834
- Heat treatment of tetrahedral amorphous carbon films grown by filtered cathodic vacuum-arc technique, 1328
- Properties of DLC films deposited by an oxyacetylene flame, 1682
- Influence of ion current on the growth of carbon films by ion-beam-assisted deposition, 1944
- Chemical, mechanical and tribological characterization of ultra-thin and hard amorphous carbon coatings as thin as 3.5nm: recent developments, 1985
- Amorphous carbon film**
Focused ion beam patterning of diamondlike carbon films, 1246
- Amorphous carbon films**
Ion implantation post-processing of amorphous carbon films, 451
Raman spectroscopy and scanning electron microscopy investigation of annealed amorphous carbon-germanium films deposited by d.c. magnetron sputtering, 668
- Amorphous Carbon Hydrogen**
The effect of refractive index on the friction coefficient of DLC coated polymer substrates, 538
- Amorphous diamond**
Estimating band gap of amorphous diamond and nanocrystalline diamond powder by electron energy loss spectroscopy, 1703
- Amorphous hydrogenated carbon**
A correlation between the microstructure and optical properties of hydrogenated amorphous carbon films prepared by RF magnetron sputtering, 527
Etching process of hydrogenated amorphous carbon (a-C:H) thin films in a dual ECR-r.f. nitrogen plasma, 572
Properties of amorphous a-CH(:N) films synthesized by direct ion beam deposition and plasma-assisted chemical vapour deposition, 595
Non-Arrhenius temperature dependence of direct-current conductivity in amorphous carbon (a-C:H) above room temperature, 1919
- Anhydrous and hydrous magnesium sulfate solvent**
Diamond formation from graphite in the presence of anhydrous and hydrous magnesium sulfate at high pressures and high temperatures, 73
- Anisotropy**
A simple model to describe the anisotropy of diamond polishing, 840
- Annealing**
Thermal annealing behaviour of alloyed DLC films on steel: Determination and modelling of mechanical properties, 510
Binding state transformation in high temperature synthesized CN thin films, 614
Instantaneous annealing of CVD diamond during high dose-rate ion implantation, 877
Atomic force microscopy investigation of the effects of annealing on amorphous carbon nitride films deposited by r.f. magnetron sputtering, 993
Depletion of surface boron of heavily boron-doped diamond films by annealing, 1006
- Observation of the H2 defect in gem-quality type Ia diamond, 1061
- Metal-insulator transition in boron-ion implanted type IIa diamond, 1508
- New infrared absorption centres in electron irradiated and annealed type Ia diamonds, 1576
- Diamond-like carbon nanocrystals formed by implanting fused quartz and sapphire (α -Al₂O₃) with carbon ions, 1642
- Crystallization by post-treatment of reactive r.f. -magnetron-sputtered carbon nitride films, 1906
- Non-Arrhenius temperature dependence of direct-current conductivity in amorphous carbon (a-C:H) above room temperature, 1919
- Effect of annealing on SiC thin films prepared by pulsed laser deposition, 2099
- Applications**
Diamond tips and cantilevers for the characterization of semiconductor devices, 283
Diamond-like carbon: state of the art, 428
Diamond as an active sensor material, 1741
DLC coating for video head, 1770
- Atomically flat surface**
Homoepitaxial diamond film with an atomically flat surface over a large area, 1272
- Atomic force microscopy**
The effects of substrate temperature and laser wavelength on the formation of carbon thin films by pulsed laser deposition, 463
RHEED and AFM studies of homoepitaxial diamond thin film on C(001) substrate produced by microwave plasma CVD, 701
Atomic force microscopy investigation of the effects of annealing on amorphous carbon nitride films deposited by r.f. magnetron sputtering, 993
A modified indenter technique for generating cone cracks in diamond and new results obtained from the technique, 1544
Nanoscope investigations of diamond properties by scanning probe microscopy techniques, 1581
Application of diamond-like carbon films to the integrated circuit fabrication process, 2018
- Atomic hydrogen**
Surface carbon saturation as a means of CVD diamond nucleation enhancement, 139
H atom production in a hot filament chemical vapour deposition reactor, 1383
- Average height profile**
Physical properties of a:DLC films and their dependence on parameters of deposition and type of substrate, 1050
- Band gap**
Estimating band gap of amorphous diamond and nanocrystalline diamond powder by electron energy loss spectroscopy, 1703
- Band structure**
3C SiC(001) surface structure studied by angular resolved photoelectron spectroscopy and reflectance anisotropy spectroscopy, 331
Effect of Si on the electronic structure of sputter-deposited C films: an electron spectroscopy study, 517
Third-order optical nonlinearity of semiconductor carbon nanotubes: third harmonic generation, 1240
Angular-resolved study of secondary-electron emission from NEA diamond surfaces, 1485
- Barrier properties**
Barrier properties of carbon films deposited on polymer-based devices in aggressive environments, 2103
- Bias**
Mechanism of diamond nucleation enhancement by electron emission via hot filament chemical vapor deposition, 123

- Control of ion energy using a screen-grid in an electron cyclotron resonance chemical vapour deposition system, 477
- Bias-enhanced nucleation
 - Effect of oxygen on the bias-enhanced nucleation of diamond on silicon, 160
- Bias method
 - Effects of bias voltage on microwave plasma used for diamond growth, 1406
- Bias nucleation
 - Negative-biased diamond nucleation on silicon at a wide range of methane concentrations in hot filament chemical vapour deposition, 1135
- Bio-material
 - Nano-carbon nitride synthesis from a bio-molecular target for ion beam sputtering at low temperature, 605
- BN phase
 - Nanocrystalline C-BN synthesized by mechanical alloying, 610
- BN phases
 - Abrupt irreversible transformation of rhombohedral BN to a dense form in uniaxial compression of CVD material, 361
 - A comparative study of composition, structure and elastic properties of boron nitride films deposited by magnetron and ion beam sputtering, 410
- Bonding
 - Deposition of carbon nitride films by reactive pulsed-laser ablation at high fluences, 582
 - Nanocrystalline C-BN synthesized by mechanical alloying, 610
- Bonding defects
 - An investigation of structural defects in diamond films grown at low substrate temperatures, 651
- Boron
 - Comparison of P, N and B additions during CVD diamond deposition, 171
 - Analysis of transient currents due to the electron beam irradiation to boron-doped homoepitaxial diamond films, 892
 - Surface morphology and electrochemical properties of highly boron-doped homoepitaxial diamond films, 2059
- Boron-doped
 - Depth profiles of boron and hydrogen in boron-doped diamond films and related performance characteristics, 1229
- Boron-doped diamond
 - Depletion of surface boron of heavily boron-doped diamond films by annealing, 1006
- Boron carbide
 - Boron carbide thin films deposited by tuned-substrate RF magnetron sputtering, 402
 - Boron carbide thin film deposition using supersonic plasma jet with substrate biasing, 1878
- Boron compensation
 - Temperature behavior of the 6H-SiC pn diodes, 341
- Boron doping
 - Electrical properties of homoepitaxial boron-doped diamond thin films grown by chemical vapor deposition using trimethylboron as dopant, 42
 - Effect of total reaction pressure on electrical properties of boron doped homoepitaxial (100) diamond films formed by microwave plasma-assisted chemical vapor deposition using trimethylboron, 1079
 - Electrical Properties of B-doped homoepitaxial diamond films grown from UHP gas sources, 1470
 - Cathodoluminescence of boron-doped heteroepitaxial diamond films on platinum, 1587
- Boron nitrides
 - On some alkali- and alkaline-earth-metal boron nitrides, unsaturated with boron, 2152
- Boron profile
 - Depth profiles of boron and hydrogen in boron-doped diamond films and related performance characteristics, 1229
- Bound excitons
 - Ion implantation and annealing of diamond studied by emission channeling and cathodoluminescence, 1623
- Bulk diamond
 - Cumulative deformation and fatigue of diamond — new developments, 1515
- c-BN
 - Nucleation of c-BN on various substrate materials under high-pressure-high-temperature conditions, 415
- c-BN films
 - Microstructure of c-BN thin films deposited on diamond films, 325
 - Synthesis of adhesive c-BN films in pure nitrogen radio-frequency plasma, 382
- C₂H₄
 - Optical-quality diamond growth from CO₂-containing gas chemistries, 236
- C₃N₄
 - CN_x film characterization by surface sensitive methods: XPS and XAES, 601
 - Nano-carbon nitride synthesis from a bio-molecular target for ion beam sputtering at low temperature, 605
- C₃N₄ crystallites
 - The effect of substrate temperature on the growth of CN_x films with β-C₃N₄-like microcrystallites by an inductively coupled plasma (ICP) sputtering method, 1315
- CaCO₃
 - Spontaneous nucleation of diamond in the system MgCO-CaCO-C at 7.7 GPa, 1900
- Camphor
 - Contribution of sp³ clusters in films and fibers obtained from camphor, 481
 - Semiconducting carbon films from a natural source: camphor, 485
- Capacitor
 - High-temperature diamond capacitor, 1875
- Carbide
 - Nanocrystalline C-BN synthesized by mechanical alloying, 610
- Carbide formation
 - Early stages of carbon film growth: carbide interface formation on molybdenum, 155
- Carbides
 - Inclusions in diamonds with solubility changes and phase transformations, 78
 - Mapping of 6H-SiC for implantation control, 335
 - Carbide contacts on homoepitaxial diamond films, 961
- Carbides or nitrides
 - Microstructure and mechanical properties of pulsed laser deposited boron nitride films, 377
- Carbon
 - Structural and electronic properties of highly photoconductive amorphous carbon nitride, 440
 - Semiconducting carbon films from a natural source: camphor, 485
 - Third-order optical nonlinearity of semiconductor carbon nanotubes: third harmonic generation, 1240
 - Synthesis and properties of single phase diamond ceramics, 2140
 - Clustering in carbon implanted, laser annealed, fused quartz, 2159
 - Radiation-induced release of hydrogen from C:H films: basic regularities and mechanism, 2164
- Carbonate-solution growth
 - Diamonds of new alkaline carbonate-graphite HP syntheses:

- SEM morphology, CCL-SEM and CL spectroscopy studies, 267
- Carbon dioxide
CVD diamond grown by microwave plasma in mixtures of acetone/oxygen and acetone/carbon dioxide, 1393
- Carbon film growth
Early stages of carbon film growth: carbide interface formation on molybdenum, 155
- Carbon films
Application-relevant characterization of magnetron-sputtered carbon nitride films, 1857
Barrier properties of carbon films deposited on polymer-based devices in aggressive environments, 2103
- Carbon nanostructures
Carbon nanostructures and diamond growth by HFCVD: role of the substrate preparation and synthesis conditions, 631
- Carbon nanotubes
Synthesis and purification of multi-walled carbon nanotubes for field emitter applications, 785
- Carbon nitride
Ellipsometric study of carbon nitride thin films with and without silicon addition, 618
Carbon and carbon nitride planar waveguides on silicon substrates, 628
A theoretical model of electron emission from amorphous carbon nitride films, 798
Atomic force microscopy investigation of the effects of annealing on amorphous carbon nitride films deposited by r.f. magnetron sputtering, 993
Characterization of magnetron sputtered carbon nitride films, 1039
On the validity of the formation of crystalline carbon nitrides, C_3N_4 , 1175
The effect of substrate temperature on the growth of CN_x films with β - C_3N_4 -like microcrystallites by an inductively coupled plasma (ICP) sputtering method, 1315
Effect of target materials on crystalline carbon nitride film preparation by ion beam sputtering, 1724
Properties of CN_x films prepared by PECVD, 1730
A review of the preparation of carbon nitride films, 1809
Crystallization by post-treatment of reactive r.f. -magnetron-sputtered carbon nitride films, 1906
- Carbon nitride C_3N_4
Solvothermal synthesis of the graphitic form of C_3N_4 as macroscopic sample, 1707
- Carbon nitrides
 CN_x coatings sputtered by DC magnetron: hardness, nitrogenation and optical properties, 1711
- Carbon overlayers
Surface carbon saturation as a means of CVD diamond nucleation enhancement, 139
- Carbothermal nitridation reaction
Synthesis of cubic aluminum nitride by carbothermal nitridation reaction, 1342
- Case diagnostics
H atom production in a hot filament chemical vapour deposition reactor, 1383
- Catalytic process
Carbon nanostructures and diamond growth by HFCVD: role of the substrate preparation and synthesis conditions, 631
- Catalytic processes
Modelling of the gas phase chemistry during diamond CVD: the role of different hydrocarbon species, 242
- Cathodic arc
Heat treatment of tetrahedral amorphous carbon films grown by filtered cathodic vacuum-arc technique, 1328
- Cathodic vacuum arc
Techniques for filtering graphite macroparticles in the cathodic vacuum arc deposition of tetrahedral amorphous carbon films, 1183
- Cathodoluminescence
Diamonds of new alkaline carbonate-graphite HP syntheses: SEM morphology, CCL-SEM and CL spectroscopy studies, 267
Comparative study of band-A cathodoluminescence and Raman spectroscopy in CVD diamond films, 640
Cathodoluminescence of diamond films grown on pretreated Si (001) substrates by microwave plasma chemical vapour deposition, 712
Radiation-activated development of defective structure in type Ia diamond, 897
Electrical Properties of B-doped homoepitaxial diamond films grown from UHP gas sources, 1470
The plastic deformation and strain-induced fracture of natural and synthetic diamond, 1536
Cathodoluminescence of boron-doped heteroepitaxial diamond films on platinum, 1587
- Cavity ring down spectroscopy
Laser diagnostics of CH in a diamond depositing flame, 1251
- Cemented carbide
Effects of the pretreatment of a cemented carbide surface on its properties and on the properties of diamond coatings deposited by oxygen-acetylene flame CVD, 207
- Ceramic
Synthesis of cubic aluminum nitride by carbothermal nitridation reaction, 1342
- Characterisation
A modified indenter technique for generating cone cracks in diamond and new results obtained from the technique, 1544
A review of the preparation of carbon nitride films, 1809
- Characterization
Nano-particles seeding and its characterization by X-ray photoelectron spectroscopy (XPS), 146
Study of diamond films grown at low temperatures and pressures by ECR-assisted CVD, 185
Back-scattering CARS diagnostics on CVD diamond, 673
Secondary electron emission measurements on synthetic diamond films, 1033
Formation and characterization of graphitized layers in ion-implanted diamond, 1631
Diamond-like carbon — present status, 1659
The influence of ion beam assisted deposition parameters on the properties of boron nitride thin films, 1697
Nitrogen addition during flame deposition of diamond: a study of nitrogen-enhanced growth, texturing and luminescence, 2127
- Chemical beam epitaxy
Fabrication of aluminium nitride/diamond and gallium nitride/diamond SAW devices, 309
- Chemical Beam Epitaxy
Optical reflectivity studies of GaN and AlN chemical beam epitaxy on GaAs(100), 373
- Chemical resistance
Investigation of the chemical reactivity and stability of c-BN^P, 319
- Chemical vapor deposited diamond films
Filament metal contamination and Raman spectra of hot filament chemical vapor deposited diamond films, 101
- Chemical vapor deposition
Gas recycling and flow control for cost reduction of diamond films deposited by DC arc-jet, 29
Mechanism of diamond nucleation enhancement by electron emission via hot filament chemical vapor deposition, 123

- Effect of nitrogen incorporation into diamond-like carbon films by ECR-CVD, 472
- Synthesis of CVD diamond at atmospheric pressure using the hot-filament CVD method, 1057
- Characterization of the near-surface gas-phase chemical environment in atmospheric-pressure plasma chemical vapor deposition of diamond, 1863
- WC-Co cutting tool inserts with diamond coatings, 1913
- Diamond nucleation suppression in chemical vapor deposition process, 2110
- Chemical vapor deposition (CVD)
 - Study of defects in CVD and ultradisperse diamond, 1476
- Chemical vapour deposition
 - UHREM investigation of stacking fault interactions in the CVD diamond structure, 682
 - Inductively coupled r.f. plasma assisted chemical vapour deposition of diamond-like carbon coatings, 1193
 - Laser diagnostics of CH in a diamond depositing flame, 1251
 - H atom production in a hot filament chemical vapour deposition reactor, 1383
 - The potential of CVD diamond as a replacement to ZnSe in CO₂ laser optics, 1759
 - Application of diamond-like carbon films to the integrated circuit fabrication process, 2018
- Chemisorption
 - Surface quality and composition dependence of absolute quantum photoyield of CVD diamond films, 725
 - Secondary electron emission measurements on synthetic diamond films, 1033
- Chlorine
 - A review of diamond CVD utilizing halogenated precursors, 1
- CN films
 - Binding state transformation in high temperature synthesized CN thin films, 614
- CO₂
 - Optical-quality diamond growth from CO₂-containing gas chemistries, 236
- CO₂ laser
 - The potential of CVD diamond as a replacement to ZnSe in CO₂ laser optics, 1759
- Coating
 - The effect of refractive index on the friction coefficient of DLC coated polymer substrates, 538
 - Coatings for the protection of diamond in high-temperature environments, 916
 - The influence of ion beam assisted deposition parameters on the properties of boron nitride thin films, 1697
 - Improved-quality needles with a diamond-like coating (DLC) for stitching machines and their production technology, 1765
- Coincidence measurements
 - Ion beam induced luminescence maps in CVD diamond as obtained by coincidence measurements, 1592
- Collection efficiency
 - Thin film diamond alpha detectors for dosimetry applications, 952
- Coloured gems
 - Things we still don't know about optical centres in diamond, 1455
- Combustion flame
 - Effects of the pretreatment of a cemented carbide surface on its properties and on the properties of diamond coatings deposited by oxygen-acetylene flame CVD, 207
- Combustion synthesis
 - Properties of DLC films deposited by an oxyacetylene flame, 1682
- Composites
 - Effects of titanium and aluminum incorporations on the structure of boron nitride thin films, 386
 - Diamond-carbon nanocomposites: applications for diamond film deposition and field electron emission, 1496
 - cBN-TiN, cBN-TiC composites: chemical equilibria, microstructure and hardness mechanical investigations, 1838
- Compositional analysis
 - Characterization of magnetron sputtered carbon nitride films, 1039
- Computer simulation
 - Three-dimensional diamond growth film simulations: correlations between nucleation and surface parameters, 150
 - Modelling of the gas phase chemistry during diamond CVD: the role of different hydrocarbon species, 242
 - Modelling of interstitial-related defects in diamond, 1560
- Conduction mechanism
 - Field emission conduction mechanisms in chemical-vapour-deposited diamond and diamond-like carbon films, 1490
- Conductivity
 - Metal-insulator transition in boron-ion implanted type IIa diamond, 1508
- Confocal Raman spectroscopy
 - Confocal Raman imaging for the analysis of CVD diamond films, 657
- Conical shape
 - Diamond tip fabrication by air-plasma etching of diamond with an oxide mask, 2169
- Contacts
 - Ion implantation and anneal to produce low resistance metal-diamond contacts, 1936
- Copper
 - Diamond-like two-phonon absorption in hydrogenated amorphous carbon modified with copper, 554
- Copper nitride
 - Cu₃N films prepared by the low-pressure r.f. supersonic plasma jet reactor: Structure and optical properties, 1715
- Cost per carat
 - Gas recycling and flow control for cost reduction of diamond films deposited by DC arc-jet, 29
- Crystal defects
 - High-resolution electron microscopy and electron spin resonance studies on cubic boron nitride crystals made by high-pressure/high-temperature synthesis, 738
- Crystal growth
 - Investigation of plasma jet gas-dynamic effect on a substrate in conditions of diamond coating synthesis, 202
 - Site-selective plasma CVD based on catalytic nucleation enhancement: fabrication of micro-diamond arrays, 1423
 - Growth of diamond with Zr-containing molten metal solvents and metal elements as incorporated impurities, 1438
- Crystalline carbon nitride
 - On the validity of the formation of crystalline carbon nitrides, C₃N₄, 1175
- Crystalline quality
 - The effect of nitrogen on the growth, morphology, and crystalline quality of MPACVD diamond films, 220
- Crystal morphology
 - Arrowhead-like diamond crystals formed by hot-filament chemical vapor deposition, 1310
- Cubic aluminum nitride
 - Synthesis of cubic aluminum nitride by carbothermal nitridation reaction, 1342
- Cubic boron nitride
 - Improvement of the adhesion of sputter-deposited cubic boron nitride films, 110
 - Investigation of the chemical reactivity and stability of c-BN^P, 319
